SUMMARY

I am a Flutter Developer with hands-on experience building scalable, production-ready mobile applications using Flutter, Firebase, and REST APIs. Developed real-world solutions including role-based systems, event management, and business workflow applications. Skilled in clean architecture (MVC/MVVM), state management (Provider, GetX), and performance optimization. Experienced in payment integration, real-time systems, and AI-assisted development workflows. Focused on delivering efficient, user centric mobile application.

TECHNICAL SKILLS

Languages : Dart, Java,
Developer Tools : VS Code, Android Studio, Postman, Firebase, GitHub,
Backend & Integration: REST APIs, JSON, Firebase (Authentication, Firestore, Cloud Storage, FCM)
Frameworks : Flutter
Statemanagement: Provider, GetX
Development Approach: Performance Optimization, Modular Codebase, AI-assisted Development Workflows
UI & Architecture: Clean Architecture (MVC/MVVM), Responsive UI Design, Scalable System Design
Payment Integration: Razorpay (Payment Gateway Integration)

EXPERIENCE

Flutter Developer | Internship | V4U Technologies

Ahmedabad, India

Jan 2025 – July 2025

- Gained hands-on experience in developing real-world Flutter projects under expert guidance, applying industry best practices.
- Optimized performance and resolved UI/functional issues to enhance application stability and user experience
- Implemented Provider-based state management and contributed to testing and debugging workflows

PROJECTS

Sukhadiya Caterers | Flutter, Provider, Rest API Integration, MVVM

- Developed a scalable event management application to streamline catering operations for multiple events.
- Implemented real-time event tracking and schedule management for improved workflow efficiency.

- Integrated REST APIs and optimized performance for a smooth and responsive user experience.
- Utilized Provider for structured state management and maintainable UI architecture.

DreamFirstNews | Flutter, Firebase, REST APIs, Razorpay, AI-assisted Development

- Built a scalable news application with role-based system (User, Reporter, Admin) and content approval workflow.
- Integrated Firebase (Auth, Firestore, Storage, FCM) for real-time data and notifications.
- Implemented reward system and Razorpay payment integration.
- Designed clean architecture (MVC/MVVM) with modular and scalable codebase

EDUCATION

Government Engineering College, Modasa 2021 – 2025
Bachelor of Engineering in Computer Engineering (CGPA: 7.16)

SOFT SKILLS

• Problem-solving mindset with ability to debug and optimize real-world application issues
• Strong collaboration and communication skills through client interaction and team projects
• Adaptability to new technologies and fast learning in dynamic development environments
• Ownership-driven approach with focus on delivering scalable and user-centric solutions.

EXTRACURRICULAR

GDSC SOLUTION CHALLENGE | Team Leader

- I participated in the GDSC Google Solution Challenge as a team leader, where I guided my team in building impactful tech solutions. It was a great opportunity to lead, collaborate, and innovate for real-world problems.

LANGUAGE CLUB | Core Member

- As a core member of the Language Club, leading important debates and discussions to enhance communication and critical thinking skills.

CERTIFICATIONS

- Solution Challenge
