PROFESSIONAL SUMMARY

Flutter Developer with hands-on experience building scalable, production-grade mobile applications using Flutter, Firebase, and REST APIs. Proficient in MVC/MVVM architecture, Provider & GetX state management, performance optimization, and Razorpay payment integrations. Delivered measurable results: reduced moderation effort by ~70%, screen rebuilds by 90%+, and achieved 95% client retention.

TECHNICAL SKILLS

Languages: Dart, Java

Mobile: Flutter, Provider, GetX, Responsive UI

Backend & Cloud: Firebase (Auth, Firestore, Storage, FCM), REST APIs, JSON, Dart Frog, Docker

Architecture: MVC, MVVM, Clean Architecture, Performance Optimization

Tools & Integrations: Android Studio, VS Code, Postman, GitHub, Razorpay, Google Ads, Google Cloud

WORK EXPERIENCE

Flutter Developer Intern | **V4U Technologies, Ahmedabad** *Jan 2025 – Jul 2025*

- Built real-world Flutter projects applying industry best practices across the full mobile development lifecycle.
- Optimized app performance and resolved UI/functional issues, improving stability and user experience.
- Implemented Provider-based state management; contributed to testing and debugging for production releases.

Freelance Flutter Developer | Freelance *Jul 2025 - Present*

- Implemented MVVM architecture with Provider and GetX state management to build scalable, maintainable, and high-performance mobile applications.
- Integrated REST APIs and developed responsive UI components, improving application functionality and user experience.
- Developed and maintained production-ready Flutter applications including Sukhadiya Caterers, Shree Hari Caterers, and Just Wedding Software.
- Contributed to the development of the DreamFirst News App by implementing article publishing, approval workflows, and role-based content management features.
- Integrated Google Mobile Ads, Firebase services, and push notifications to enhance monetization and user engagement.
- Developed backend APIs using Dart Frog and assisted in Docker-based deployment on Google Cloud Platform (GCP).

PROJECTS

DreamFirst News App | *Flutter, Firebase, FCM, Google Cloud, Google Ads, Razorpay*

- Built a scalable news app with role-based access (User, Reporter, Admin), reducing manual moderation by **~70%**.
- Integrated Firebase (Auth, Firestore, Storage, FCM) for real-time data and notifications.
- Implemented Razorpay payment gateway and rewards system, improving monetization and transaction flow.
- Designed modular MVC/MVVM architecture, reducing code duplication by **~40%** and improving scalability.

Sukhadiya Caterers Restaurant App | *Flutter, Provider, REST APIs, MVVM*

- Developed an event management app to streamline catering operations across multiple concurrent events.
- Implemented real-time event tracking and schedule management for improved workflow efficiency.
- Built Provider-based state management reducing unnecessary screen rebuilds by **over 90%**.

EDUCATION

B.E. in Computer Engineering — Government Engineering College, Modasa (GTU) *Aug 2021 – Jul 2025*

CGPA: 7.16 / 10.0

ACHIEVEMENTS & ACTIVITIES

Google Developer Solution Challenge — Team Leader **Certificate**

Language Club — Core Member, Government Engineering College, Modasa
